

The National Science Foundation (NSF) and National Security Agency (NSA) recognize the need for a high quality STEM workforce. STEM majors enjoy an advantage in today's economy and are projected to remain in-demand well into the future. Strengthen your science degree without increasing time to graduation. For more information, see

www.uncg.edu/mat/undergraduate/minor.html .

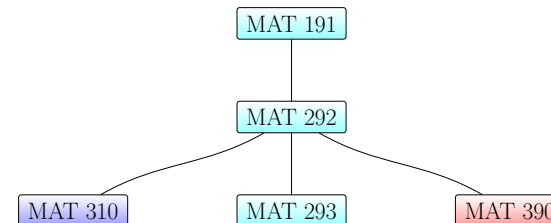

Biology BS

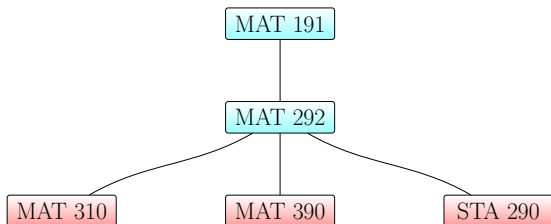

The mathematics minor requires five math courses, including MAT 191, MAT 292, and MAT 310 or MAT 353. With proper selection of electives, you can earn a math minor as you progress toward your science degree.
