To:Stephen Tate <srtate@uncg.edu>

Dr. Franklin D. Gilliam, Jr.
Chancellor UNCG

Dear Dr. Guilliam,

Over the last twenty years your Department of Mathematics has become a highly recognized institution at the national and international levels. The doctoral program in Computational Mathematics stands out in this great enterprise. Because teaching and research in mathematics go hand in hand, debilitating the graduate program will be deleterious to the mathematical education of your entire student body. Dismantling this doctoral program is counterproductive.

Sincerely,

Alfonso Castro

McAlisto Professor of Mathematics at Harvey Mudd College

Fellow of the American Mathematical Society

Member of the Colombian Academy of Sciences
